- Advanced Software Privacy Protection Application [ON GOING]

- Advanced Software Privacy Protection Application
[Operating system : Windows XP,Language: JAVA, Data Base:MYSQL]

[Modules:Admin,Customer,Software Protection,Key Generation] Application security describes security measures at the application level that aim to prevent data or code within the app from being stolen or hijacked. It encompasses the security considerations that happen during application development,design and installation, but it also involves systems and approaches to protect apps before they get installed.

➤ Super Market Management System

[Software used: Visual Basic, C#, XAMPP].The project Supermarket Management System is developed with the objective of making the system reliable,easier, fast, and more informative.

In the manual System, there are number of inefficiencies that a salesperson faces. Large records-books have to be maintained where relevant and irrelevant information has to be stored which is very untidy and clumsy process. But our System reduces paper works. On the other hand, there are many inherent problems that exist in any manual system. Usually, they lack efficiency. Less efficiency has a great impact on the productivity of any human being keeping the data up-to-date.

➤ PlayStore Applications Data Analytics

[(IDE: Jupyter Notebook,Python)]Data Analytics is a package containing many tools that are all integral to performing analytics on data sets. This includes importing data, cleaning,data Visualization and preparing data, and tools and applications for doing statistics and data mining and implemented the Graphs charts to Analyse with better Understandings of the raw Big Data.

Strengths:

- Punctual
- Leadership
- Creative
- Strong work Ethic
- Eagerness Learn New Technologies
