Experience

Intern:

1. Content Writer in companies:
 - JungliDonkey for 1 month
 - Tripcams based on Search Engine Optimization for 2 months
2. Mobile Application Developer in Municipal Corporation Gurugram for 1 month.
3. Zensar ESD student.
4. Internship at Kasnet for 8 months in Java Technologies.

Projects

1. **WordPress using php:** In this project, I had created the login credentials for the WordPress using PHP which would check for the validity as well.
2. **Blood Bank Management System:** This was our third year mini project where we had created login and register for the admin, hospital, blood bank and user. Also, we maintained the stock for the blood available and distributed and requirements accordingly.
3. **App Development:** This was my individual project of developing an app. I made two apps both using different platforms. First is Cordova platform and second is Android Studio platform.
4. I have done detailed literature survey on five different papers on the topic "Recent trends in NLP".
5. **Scrutiny Bot: Expedite E-interview:** This was our fourth year final project, where the system involves an e-interview process for the hiring process. This involves: Chatbot, Video Interviewing, NLP and Speech Recognition.
