Project

Title : Design and Implementation of Phase Sequence Protection System for Three Phase Electric Load

Role : Team Leader

Team Size 4 members

Abstract - Our project allows to check the three-phase supply sequence. Knowing the phase sequence of three phase motors is quite an important thing. Considering if the motor uses a pumping action, even a single-phase reversal that results in the wrong sequence may lead the motor to run in the wrong the direction. Well, it may also lead to fail permanently due to dry run of the motor.
