Academic Projects

- **Final year project:** “Foot Step Power Generation”

Here we propose an advanced footstep power generator system that uses peizo sensors to generate power from human footsteps. The sensors are placed in such an arrangement so as to generate maximum output voltage. This is then provided to our monitoring circuitry. The circuit is a microcontroller based monitoring circuit that allows user to monitor the voltage and charges a connected battery by it.

- **Mini-project:** **1. Multi-sound Security**
 2. Wireless Notice-board
