## Project Works:

- Academic forum for student and parents:** *Nov 2019 – Dec 2019*
  - Worked in a mini project for creating Academic Forum for students and parents.
  - Worked on designing and data collection using Visual basic VB.6.0 & MySQL.
  - This project displays a complete detail of the academic data like fee structure, courses etc. as a result.
  - We used VB.6.0 for programming along with MySQL for database and Windows 7,8,10 as operating system.
- Blood Bank Management System:** *Mar 2020 – Apr 2020*
  - We designed a Blood Bank Management System using HTML5 & CSS3 under Professor Felcy Judith.
  - This Data management system provides the real time update on every blood bank and displays the live feeding of in stock and out of stock blood data, which is used to track and promote people for donating the blood.
  - I used HTML5& CSS3 for programming along with MySQL for database and Windows 7,8,10 as operating system.
- Crop Recommendation using weather and soil content:** *Dec 2021 – Present*
  - We are working on the machine learning algorithm which is later used to analyze and predict the soil which is suitable for yielding right crops at right time based on the weather and soil content.
  - This prototype helps the farmers in choosing right crop and reduces the risk of loss.
