PERSONAL PROJECTS

1. **Wireless Automation in Agriculture Field**

- 3rd Rank in National level Computation
- In this project we can operate the water pump wirelessly with the help of solenoid valve and feed the water smartly and also indicate the water level of the well and give the protection to the water pump.

2. **Smart Water Distribution and Disaster Management System**

- In this project water is automatically disturbed by using solenoid . The Arduino firstly check level of the water in the tank by using level sensor. Project also consist of disaster management like fire disaster. Leakage detection etc. Also the project Is capable to detect fire and extinguish it.

WORKSHOP

I have completed a 7 days workshop on Arduino and sensors.
